

SCOPES 2009-2012

Guidelines for final scientific report (CG)

(for Conference grants, please do not use the general scientific report)

The final report must be submitted to the SNSF by the Swiss conference organiser **(electronically and in print)**.

The short report (1 – 2 pages) should contain details about the conference and in particular about the conference participants (supported by this grant) and their contribution to the conference.

Include any documents (publications, etc.) which you consider to be of relevance. It is not mandatory to submit the proceedings. We are however interested to receive the link, if available electronically.
