

Horizon Europe Transitional Measures: Call document for SNSF Swiss Postdoctoral Fellowships 2024

Switzerland is considered a non-associated third country in the 2024 calls for project proposals in Horizon Europe (work programme 2023-2025) and related programmes and initiatives. For mono-beneficiary schemes such as the Marie Skłodowska-Curie Actions (MSCA) Postdoctoral Fellowships, therefore, early-career researchers with destination Switzerland are not eligible to apply for European fellowships. For this reason, the SNSF is offering an alternative, comparable call for proposals as part of the transitional measures in 2024. The aim is to maintain Switzerland's strong position as a research hub. Applicants who intended to apply for an MSCA Postdoctoral Fellowship to pursue research and training in Switzerland under Horizon Europe can submit their proposal to the SNSF. This document sets out the rules and procedures for submitting a proposal to the transitional **SNSF Swiss Postdoctoral Fellowships Call 2024**. Key characteristics of the funding scheme are summarised in **Box 1**.

Key characteristics of the SNSF Swiss Postdoctoral Fellowships Call 2024

- The scheme is **open to all** research disciplines and topics.
- **Applicants must** have a **PhD degree** and **not more than eight years** of postdoctoral experience. They want to pursue **further scientific training** at a non-commercial research institution in Switzerland for **12-24 months**.
- The grant includes the **postdoctoral fellow's salary** with social security contributions, financial contributions to research and conference costs.
- The proposal is submitted in one step and must include the **research plan**, the **CV and major achievements (new CV format)**, the **host institute's confirmation** and the **supervisor's support letter**.
- The **evaluation** will be carried out remotely based on expert reviews in a single step and without interviews.
- The following **evaluation criteria** apply: '**excellence**', '**impact**', and '**quality and efficiency of the implementation**'.
- Host institutions and supervisors must agree to **ensure suitable conditions** so that the applicants can receive the **appropriate training and support**.
- The call will open on **2 September 2024** and close on **2 December 2024**.
- The applicants will be informed of the final decisions in **June 2025**. The projects can start at the earliest in **July 2025**.
- The funding of the projects is **expressly subject to** the financing decisions of the responsible federal bodies (Federal Council and Parliament).

1. Eligibility criteria

1.1 Applicant

Proposals for the SNSF Swiss Postdoctoral Fellowships Call 2024 may be submitted by researchers of any nationality from all disciplines for a duration of 12-24 months. The following criteria apply:

Degree:

- At the time of submission deadline, applicants must hold a **doctoral degree (PhD)**¹ to be eligible as **postdoctoral researchers**.
- Applicants who have defended their doctoral thesis before the submission deadline but have not yet formally been awarded the doctoral degree will also be considered postdoctoral researchers and eligible. An official document confirming that they have successfully passed the doctoral exam is required.

Eligibility window:

- At the time of submission deadline, proposals must be submitted **within 8 years** after the obtainment of the relevant degree, i.e. the doctoral degree (PhD)². The relevant date is that of the examination or thesis defence.
- This time window may be extended if one or more of the reasons set out in Clause 1.11 of the General implementation regulations for the Funding Regulations³ are met. The reasons for extending the time window must be outlined in the proposal.

Mobility rule:

- Applicants must not have resided or carried out their main activity (work, studies, etc.) in Switzerland for more than 12 months in the 36 months immediately prior to the submission deadline.

Work quota:

- Applicants must in general commit themselves as grantees to a work quota of 100% (1.0 FTE). A part-time work quota corresponding to at least 80% (0.8 FTE) is possible if the grantee has clinical, or care duties, or pursues courses at a higher education institution to further his/her career.
- Researchers doing clinical work must devote at least 80% of the funded work quota to the project and training related to the project.

Multiple applications and duplicate funding:

- Proposals for an SNSF Swiss Postdoctoral Fellowship may only be submitted for a duration of support for which no other career grants of the SNSF have been applied. The restrictions apply to the entire application procedure. In case of a parallel submission, the proposal will not be considered for evaluation by the SNSF⁴.

¹ A medical doctor degree will be accepted only if it corresponds to a doctoral degree (PhD, MD-PhD) or if the researcher has been demonstrably appointed to a position that requires doctoral equivalency (e.g. professorship appointment thanks to a Staatsexamen or equivalent exam). Medical doctor degrees corresponding to basic medical training (e.g. MD, see also Annex V of Directive 2005/36/EC) will not be accepted as a doctoral degree.

² Or, for applicants with a medical doctor degree, the relevant degree (MD-PhD) or equivalency pursuant to the previous footnote.

³ <http://www.snf.ch/SiteCollectionDocuments/snsf-general-implementation-regulations-for-the-funding-regulations-e.pdf>.

Accepted reasons for extending the eligibility window: paternity, adoption or parental leave; inability to work due to illness or accident; care duties; services that benefit the general public, particularly military or civilian service; continuing education in connection with the applicant's research activities, particularly internships or clinical work; preparatory activities connected to the dissertation, e.g. participation in classes at a doctoral school.

⁴ Parallel submissions for the Postdoc.Mobility scheme are limited to applications for a return grant.

Further submission restrictions

- Applicants whose proposal was rejected under SNSF Swiss Postdoctoral Fellowships 2023 may only submit a revised application involving the same Swiss host institution if an evaluation score of at least 6.3 was achieved.

1.2 Host institutions

The host institution must be established in Switzerland as a legal entity (public or private). Higher education institutions or non-commercial research institutions outside the higher education sector that are domiciled in Switzerland and whose basic financing is predominantly Swiss according to Swiss law are eligible.

In principle, the SNSF Swiss Postdoctoral Fellowship is awarded for a continuous stay in Switzerland of 12-24 months. It is possible, however, to conduct short research stays at different host institutions for the maximum total duration of one third of the SNSF Swiss Postdoctoral Fellowship. These additional host institutions can either be higher education institutions or institutions operating in applied fields (industry, administration, etc; intersectoral mobility). During the period spent at another host institution, the grantee remains employed at the host institution in Switzerland.

Before applying, please discuss the conditions of the project and how you intend to carry it out with the supervisor at the host institution. A formal confirmation by the host institution as well as a commitment letter from the supervisor is required.

2. Formal requirements, ethical issues and research integrity

2.1 Legal basis

The general provisions of the SNSF (Funding Regulations⁵ and the General implementation regulations for the Funding Regulations⁶) apply to the SNSF Swiss Postdoctoral Fellowships Call 2024 and the corresponding funding procedures. This call document is issued by the Presiding Board of the National Research Council under a mandate from the State Secretariat for Education, Research and Innovation (SERI) to set up a transitional measure for the MSCA Postdoctoral Fellowships 2024 (HORIZON-MSCA-2024-PF-01) call.

2.2 User account in mySNF

The applicant must have a mySNF user account. Registration is via www.mysnf.ch. It is strongly recommended that new user accounts are requested at least **one month before the submission deadline** so that the required information and documents can be prepared early enough. The mySNF access will remain in place for future submissions or the lifetime management of approved projects.

⁶ <http://www.snf.ch/SiteCollectionDocuments/snsf-general-implementation-regulations-for-the-funding-regulations-e.pdf>

2.3. Ethics and integrity

Applicants need to declare research activities and methods that have ethical implications or that may raise questions requiring sound ethical assessment. Hence, please take note of the Swiss laws and ethical standards. Furthermore, the rules on research integrity and good scientific practice must be strictly respected⁷.

2.4 Open access

Under the SNSF Swiss Postdoctoral Fellowships Call 2024, grantees must guarantee open access to all peer-reviewed scientific publications of their results as set out in the SNSF Funding Regulations and the General implementation regulations for the Funding Regulations.

3. Budget

SNSF Swiss Postdoctoral Fellowships cover the **grantee's salary**, including social security contributions⁸. The SNSF determines the salary for postdocs by agreement with the research institution and in accordance with the salary scales applied by the institution to researchers with comparable qualifications. The SNSF may set an upper limit for the salary.

As outlined above (1.1. Work quota), for researchers doing clinical work, the SNSF covers only the share of the salary awarded for the research work (at least 80%). The share allocated for clinical work (up to 20%) must be financed by the research institution.

Project funds, including research costs directly linked to the implementation of the project, training and networking contributions, are also covered. Project funds must not exceed CHF 24'000 for a two-year grant. If the duration of the SNSF Swiss Postdoctoral Fellowship is less than 2 years, the maximum amount will be proportionately smaller.

Indirect costs: no input required. The SNSF will calculate an overhead and pay it directly to the host institution.

⁸ For further information about salary ranges for postdocs and social security contributions, please see: https://www.snf.ch/SiteCollectionDocuments/allg_doktorierende_e.pdf

4. Online application process

4.1. Required documents

All documents must be in **English**. The font must be Times New Roman, Arial or similar with a size of at least 11, single line spacing and margins of 1.5 cm on the side and 1.5 cm at the bottom. The documents must be submitted in PDF format.

The following documents must be included in the application and uploaded to the corresponding data containers. The details and instructions are provided in the 'Guidelines for SNSF Swiss Postdoctoral Fellowships applications via mySNF' (available with the opening of the call). Additional information about each required document can be found directly on mySNF in the corresponding data container.

- Research plan: max. 10 pages, the template in mySNF must be used
- CV and major achievements (new CV format)
- Copy of degree certificates / diplomas
- Confirmation from the host institution
- Support letter from the supervisor

4.2. Creating a new application

To create a new application, please select the option 'Create new application' on the mySNF home page by navigating to the relevant funding scheme under **Programmes > EU Transitional Measures > SNSF Swiss Postdoctoral Fellowships**. The data concerning the applicant and the application must be entered in the mySNF entry mask. The data includes the title, the discipline(s), keywords, any relation to other ongoing projects and current proposals, the host institution and the budget.

4.3. Receipt and verification at the SNSF

Verification of formal requirements and eligibility

- **Online application:** The SNSF Administrative Offices check whether all proposals are from eligible applicants and meet the formal requirements. Proposals that do not meet the eligibility or formal criteria are rejected.

Verification of research integrity and good scientific practice

The Administrative Offices of the SNSF may check whether the application respects the rules of scientific integrity (see Regulations of the National Research Council on the treatment of scientific misconduct by applicants and grantees⁹).

Contacts between applicants and the SNSF

Queries can be addressed to the Administrative Offices of the SNSF by phone (+41 31 308 22 22) or email (spf@snf.ch). When checking submitted proposals, the Administrative Offices may contact applicants to clarify issues related to the application. Before, during and after the evaluation, the applicants are obliged to:

- provide any information requested by the SNSF
- cooperate in clarifying facts

The SNSF cannot give applicants any information on the evaluation of their proposals while the evaluation is in progress and until the decision is communicated in writing.

⁹ http://www.snf.ch/SiteCollectionDocuments/ueb_org_fehlverh_gesuchstellende_e.pdf

5. Evaluation procedure and communication of the decision

The National Research Council of the SNSF and the appointed evaluation bodies are responsible for the scientific evaluation and for making funding decisions.

The evaluation will be conducted in a fully remote setting. Discipline-specific experts will evaluate proposals that meet the formal requirements. Two reviewers per application will independently prepare separate evaluation reports. In special cases, additional experts may be consulted.

The following assessment criteria are applied:

- Excellence, weighted 50%
- Impact, weighted 30%
- Quality and efficiency of the implementation, weighted 20%

Evaluation scores are given for each of these criteria and calculated to a final numerical score. Proposals are ranked based on the final score awarded by the individual reviewers in their evaluations, according to the best practice evaluation principles applied by the SNSF. Funding decisions on proposals of similar scientific quality around the funding line may be reached by drawing lots.

Outcome of the evaluation and communication of decisions

Proposals will be funded in order of priority based on their rank and the available funding. The funding of the projects is expressly subject to the financing decision of the Parliament. The SNSF communicates the decision taken for each application in the form of a ruling (decision letter). The ruling may be appealed against before the Federal Administrative Court.

6. Administration of grants

6.1 Grants, start of grants and changes

SNFS Swiss Postdoctoral Fellowships are awarded, transferred and managed according to the rules issued by the SNSF, particularly the provisions of the Funding Regulations and its Implementation Regulations.

The payments (in Swiss francs) are made to the grant administration office of the host institution.

Grantees must start their SNSF Swiss Postdoctoral Fellowship within 12 months after receiving the ruling (decision letter); otherwise, the grant is forfeited.

In case of any changes to the research project or the conditions for conducting it, the applicant is asked to consult the SNSF in advance for approval.

6.2 Non-acceptance or premature termination

If grantees decide not to pursue the SNSF Swiss Postdoctoral Fellowship or have to terminate their research prematurely, they must notify the SNSF immediately in writing, stating their reasons for doing so.

They must reimburse the SNSF the awarded grant for the salary and other eligible costs *pro rata temporis*.

6.3 Reporting

Grantees are obliged to submit reports in accordance with the requirements defined by the SNSF, notably a final scientific report and financial reports. The duty to provide output data will remain in place after submission of the final report and will end three years after the expiry of the grant.

7. Annex

7.1 Overview of deadlines

Opening of the call	2 September 2024
Submission deadline	2 December 2024
Evaluation	February-May 2025
Communication of results	June 2025
Earliest project start	1 July 2025
Latest possible project start	1 July 2026
