

Information about SNSF Eccellenza Professorial Fellowships in clinically oriented areas

In order to particularly promote junior researchers in clinically oriented areas, the SNSF has established specific conditions for beneficiaries, which are intended to create optimal working conditions for supporting their careers.

According to the Regulations on SNSF Eccellenza Professorial Fellowships and SNSF Eccellenza Grants, SNSF Eccellenza Professorial Fellows are afforded, besides time for research, also 50% of their work time to pursue clinical activities (Articles 6 paragraph 5, Article 8 paragraph 7, and Article 10 paragraph 2).

Hence you may devote up to 50% of your work time to clinical activities. Please indicate in your application, how much time you wish to invest in clinical activities. The clinical unit of your host institute must guarantee the work time intended for research, and that you will be able to carry out your research independently.

Salary funding

The salary of an SNSF Eccellenza Professorial Fellowship is financed as follows (the share assumed by the SNSF corresponds to the level of a local assistant professorship):

Division of the working time between research and clinical activities (%)	Share of the salary paid by the SNSF (%)	Share of the salary to be paid by the clinical unit (%)
50/50	60	40
60/40	70	30
70/30	80	20
80/20	90	10

Please consider this distribution when you are establishing your budget.
