

Risk assessment

Performance of risk assessment

In the 2023 financial year, the Swiss National Science Foundation (SNSF) undertook an in-depth risk assessment, as approved by the Foundation Council. Based on this evaluation and with regard to the monitoring and risk mitigation measures implemented, no risks were identified during the past financial year that might jeopardise the financial situation of the SNSF substantially or in the long term. In the opinion of the SNSF, no relevant risks are likely to arise in the near future that might require any adjustment of the accounting figures for assets or liabilities.
