

## Explanation of the FAIR data principles

Wilkinson et al. (2016), The FAIR Guiding Principles for scientific data management and stewardship, Scientific Data 3, doi:10.1038/sdata.2016.18

Principle		In other words	Researcher's responsibility	Requirements to be fulfilled by the repository
r V	F1. (meta)data	Each data set is assigned a globally unique and	Ensure that each data set is assigned a globally unique	A repository needs to have a predictable way to as-
