## 2010-Research funding in figures

In 2010 the Swiss National Science Foundation (SNSF) granted funding to the total value of 726 million Swiss francs, 2.7 \% more than in 2009 ( 707 million Swiss francs). This financing was used to support around 3,100 research undertakings.

The statistics include all applications processed and approved during the financial year as well as contributions paid out in the area of National Centres of Competence in Research in 2010. Additional grants are not treated as separate applications but are included in the approved amounts.

The data in the statistical part of the annual report are not comparable with the figures in the annual statement.

## 1. Funding in overview

### 1.1 Funding by research area

Amounts in millions CHF

## Distribution of the approved amounts

|  | Approved amount | Women | Men |
| :--- | ---: | ---: | ---: | ---: |
| Humanities and Social Sciences | 173.0 | $29 \%$ | $71 \%$ |
| Mathematics, Natural and Engineering Sciences | 247.5 | $13 \%$ | $87 \%$ |
| Biology and Medicine | 305.2 | $16 \%$ | $84 \%$ |
| Unapportionable | 0.3 |  |  |
| Total | 726.0 | $18 \%$ | $82 \%$ |

Distribution between the different divisions has changed slightly compared to the previous year. In 2010, 25 million Swiss francs were allocated to Patient-oriented Clinical Research (PaKliF). The share of "Biology and Medicine" in the approved sums thus rose by four percent.

### 1.2 Funding by type of funding

Amounts in millions CHF

## Distribution of the approved amounts

|  | Number | Amount |
| :--- | ---: | ---: |
| Investigator-driven research | 2,634 | 635.9 |
| Project funding ${ }^{1}$ | 1,360 | 466.2 |

| National Research Programmes (NRP) | 66 | 27.6 |
| National Centres of Competence in Research (NCCR) | 393 | 62.5 |
| Total | 3,093 | 726.0 |

${ }^{1}$ Without Scientific conferences

As in previous years, project funding was at the centre of the SNSF's activities in 2010. The share of National Research Programmes in the approved sums rose slightly year-on-year.

## Funding by type of funding in per cent

|  | Approved amount |  |  |
| :--- | ---: | ---: | ---: |
|  | Per cent | Women | Men |
| Investigator-driven research | $87.6 \%$ | $15 \%$ | $85 \%$ |

### 1.4 Use of approved amounts

## Total amount: CHF 726 million

As in previous years, the approved funds were used by the researchers mainly to cover personnel costs, whether for the financing of individual salaries/fellowships in the context of funding for individuals or for the appointment of personnel in research projects.

### 1.5 Personnel in research projects

Around 5,600 persons were employed in research projects in 2010. In addition, over 1,000 were supported in the context of individual funding and 1,100 were employed through the National Research Programmes and Centres of Competence in Research.

|  | Total | Women | Men |
| :--- | ---: | ---: | ---: |
| Scientists $^{1}$ | $35 \%$ | $44 \%$ | $56 \%$ |
| Personnel at doctoral level | $53 \%$ | $39 \%$ | $61 \%$ |
| Technicians, support staff | $12 \%$ | $69 \%$ | $31 \%$ |
| Total | $100 \%$ | $44 \%$ | $56 \%$ |

${ }^{1}$ Senior researchers and post-docs

Funding for research projects primarily benefits the promotion of young scientists in Switzerland. Thus 78 \% of the collaborators are 35 years old or younger ( $95 \%$ in the case of personnel at doctoral level, $56 \%$ for other scientists).

### 1.6 Success rates

Amounts in millions CHF

${ }^{1}$ Ratio of the number of applications approved to the number of applications submitted
Without conference grants
${ }^{3}$ Comprises SCOPES and North-South Research Partnerships
${ }^{4}$ Concerns only NRP 64 and NRP 65 at application leve
Concerns only the third series of NCCRs (2008-2010); two-level evaluation procedure
The success rates for project funding regularly reveal differences that are unfavourable to women. The large amount of available data enables a statistical procedure to be applied with which any potential discrimination can be determined. Multivariate analyses (see p. 19) are performed annually on the figures, taking into account gender as well as other possible factors, such as age, nationality and type of institution. If these differences are factored in, the gender effect disappears. Hence, in accordance with the GEFO study, no signs of gender discrimination could be made out in the evaluation procedures of the SNSF.

## Submitted applications by gender

|  | Women | Men |
| :--- | ---: | ---: |
| Fellowships (prospective) | $37 \%$ | $63 \%$ |
| Fellowships (advanced) | $41 \%$ | $59 \%$ |
| Marie Heim-Vögtlin Programme (MHV) | $100 \%$ | $0 \%$ |
| Ambizione | $43 \%$ | $57 \%$ |
| SNSF Professorships | $25 \%$ | $75 \%$ |
| Project funding | $20 \%$ | $80 \%$ |
| The proportion of female applicants is $100 \%$ as MHV is a programme for women scientists. |  |  |

The share of women submitting proposals declines as the academic age increases.

## 2. Project funding

In this funding category, the SNSF supports research projects of high quality across all disciplines. The topics are selected by the researchers. Grants include contributions towards personnel costs, equipment, consumables and travel expenses.

At the universities of applied sciences, the areas "art" and "health" are particularly well represented in terms of both numbers and funds. Some projects are being realised in collaboration with the universities.

## Division II: Mathematics, Natural and Engineering Sciences

## Distribution of the approved amounts

|  | Number | Amount |
| :--- | ---: | ---: |
| Mathematics | 50 | 12.6 |

| Total $^{1}$ | 586 | 155.5 |

${ }^{1}$ Special funding is included:
Research infrastructure ( 8 grants; 9.8 million CHF), R'Equip, ( 35 grants; 6.7 million CHF), FORCE/FINES, ( 15 grants; 5.6 million CHF), EUROCORES ( 5 grants; 7,1 million CHF), Scientific conferences ( 18 grants, 0.3 million CHF)

The number of approved applications rose by 10 percent year-on-year. Particularly strong growth was registered in the Engineering Sciences.

## Division III : Biology and Medicine

${ }^{1}$ Special funding included:
R'Equip ( 19 grants, 5.6 million CHF), MD-PhD ( 8 grants; 1.3 million CHF), SCORE/PROSPER ( 2 grants; 1.4 million CHF), ERANET EuroNanoMed ( 3 Grants; 0.7 million CHF), EDCTP ( 1 grant; 0.3 million CHF), EUROCORES ( 10 grants; 3.8 million CHF), cohort studies ( 5 grants; 25.2 million CHF), Scientific conferences ( 20 grants; 0.1 million CHF)

With infrastructure grants totalling 27.5 mio Swiss francs for the continuation of five cohort studies and the expansion of three CTUs (Clinical Trial Units), the Biology and Medicine division again made a strong contribution towards strengthening clinical research.

### 2.3 I nterdisciplinary research and Sinergia

## I nterdisciplinary research

In 2010, the SNSF supported a total of 29 projects with CHF 9.4 million. Both the number of submitted and approved applications as well as the requested and approved funding amounts are similar to 2009.

## Sinergia

### 2.5 Applications and grants since the year 2001

## Number of applications and grants

The number of applications submitted in project funding has risen consistently since 2005 while the number of approved applications has stagnated since 2008.

The number of applications submitted includes all project and conference applications as well as applications for special funding. ${ }^{1}$

### 2.6 Requested and approved amounts since the year 2001

## Total of requested and approved amounts

Since 2007, the amounts requested in project funding have risen more rapidly than the corresponding budget of the SNSF. The increase in approved amounts since 2007 is only partially attributable to budget increases in ordinary project funding. In 2008 and 2010, the increase was largely due to the award of earmarked funds (Special Programme University Medicine and Patient-oriented Clinical Research).

The budget for individual funding remained stable in 2010 compared to the previous year. With the exception of SNSF professorships and ProDoc, demand reached an all time peak in all funding schemes. A portion of the funds allocated to ProDoc remained unused due to the high number of sub-standard proposals. However, these funds will be available again for ProDoc in 2011.

## 4. I nternational co-operation and networking

The international involvement of the SNSF manifests itself principally in the transnational cooperation of researchers within the context of Project funding and Individual funding. This is supplemented by funding schemes specific to international collaborations.

### 4.2 I nternational networking in Project funding

Number of international collaborations

Nearly 3800 instances of international collaboration have taken place in total. The table shows the ten countries with which the most frequent collaboration has occurred.

### 4.3 Fellowships by host country

With 588 fellowships for prospective and advanced researchers, the SNSF supported a total of 655 work periods abroad. The graph shows the ten most frequent host countries.

## 5. National Research Programmes (NRP)

The National Research Programmes gererate scientific knowledge aimed at solving Switzerland's most pressing problems. The topics are specified by the Federal Council.

In 2010, the Federal Council mandated the SNSF to carry out two new NRPs: NRP 66 "Resource Wood" and NRP 67
"End of Life". For both NRPs, research work will start in 2012. NRP 56 "Language Diversity and Linguistic Competence in Switzerland" was officially concluded in December 2010.

The share of women in the ongoing NRPs has remained largely unchanged (women $20 \%$, men $80 \%$ ).
